This book is a reference suited to the unique challenges of veterinary practice in Australia and New Zealand. Both streamlined and thorough in its coverage of poisons and treatments for those locations, this focused approach allows readers to quickly find relevant information that is presented in a concise and logical manner that is useful to clinicians. The authors draw upon a wealth of knowledge of the particularities of toxicology in Australia and New Zealand to present readers with the up-to-date information required to efficiently and effectively diagnose and treat their patients. This valuable book brings a lot of recently gathered data on 612 pages

with 36 tables and 1 figure incorporated into hard cover of the book, will realize the exceptional value of this contribution to the biomedical sciences, particularly veterinary toxicology which is intended for students, researchers, teachers and professionals dealing with intoxicated animal patients.
